

Mobile Application Training Template

[patient-engaged, CR staff-administered]

This template can be used to create training materials to conduct task-based mobile app training.

[insert pictures and logos that are culturally tailored for your population, links to training videos]

Invite patient to use Application

As part of the Cardiac Rehab program, we are offering a mobile application. This is a mobile application that you can download onto your smartphone that can help you keep track of your exercise, vital signs, and medications. It also has education materials you can view and a way to send messages back and forth with the Cardiac Rehab Staff. It is your choice whether you want to use the mobile app or not. We can still do Cardiac Rehab without it, but some patients find it interesting or helpful to use the app. Would you like to use the app?

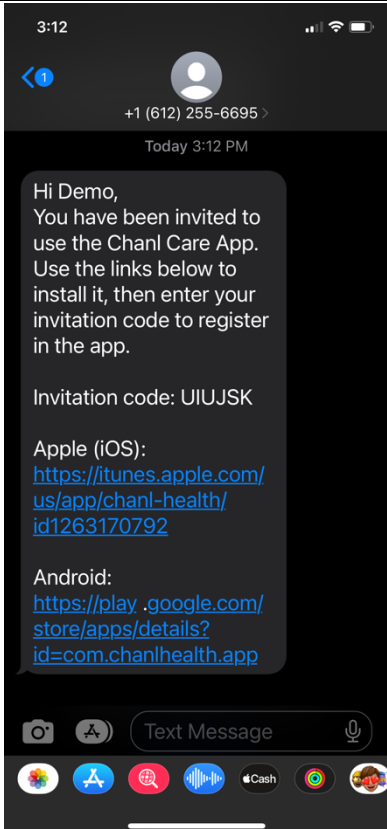

Note that exact screens will vary depending on patient settings.

Install Application (Patient)

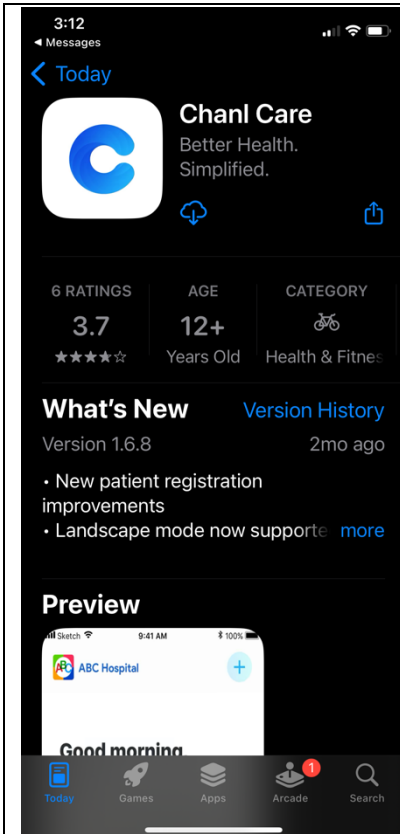

What is your mobile phone number?

[provider enters mobile phone number into provider dashboard and sends participant text message invitation]

I just sent you a text message. Go to your phone messages.

Screen	What to do on screen
	<p>If you have an iPhone, click on the link under Apple. If you have an Android phone, click on the link at the bottom.</p> <p>Other issues that may come up:</p> <ol style="list-style-type: none">1) If the person isn't sure what type of phone, have them show you their phone.2) If they receive a second text – this is part of the program – they can do that part later.3) The person may want to copy or write down the invitation code – they will need it later.

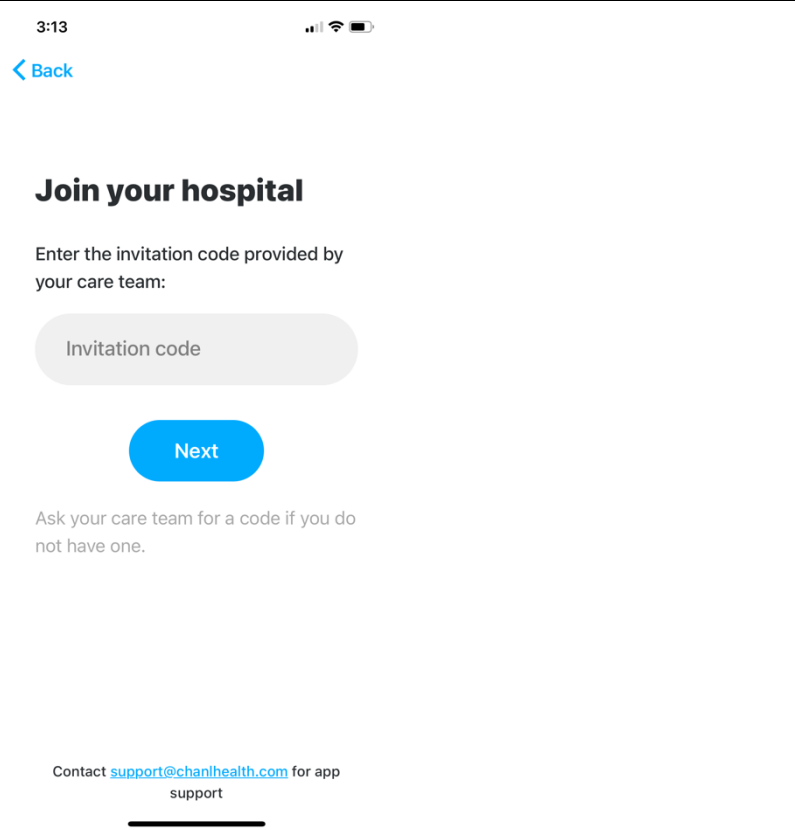

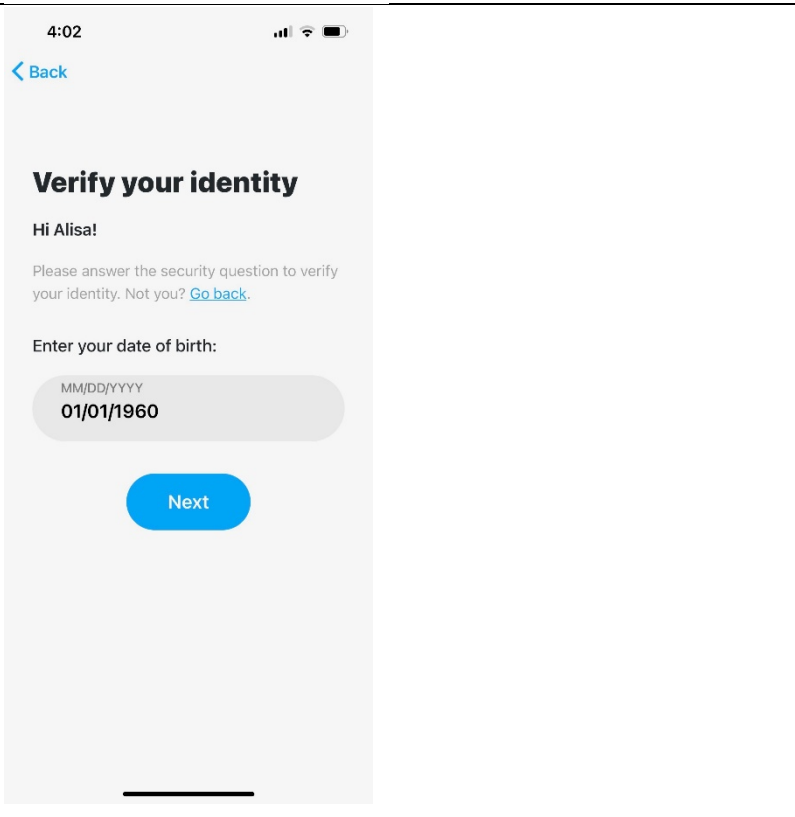

Download the application, then open the application.

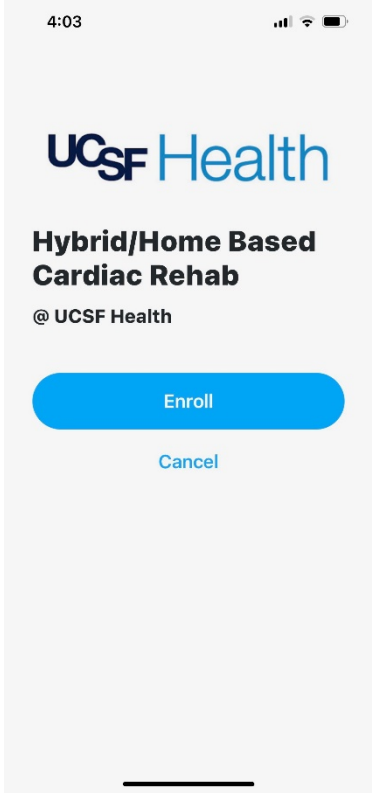

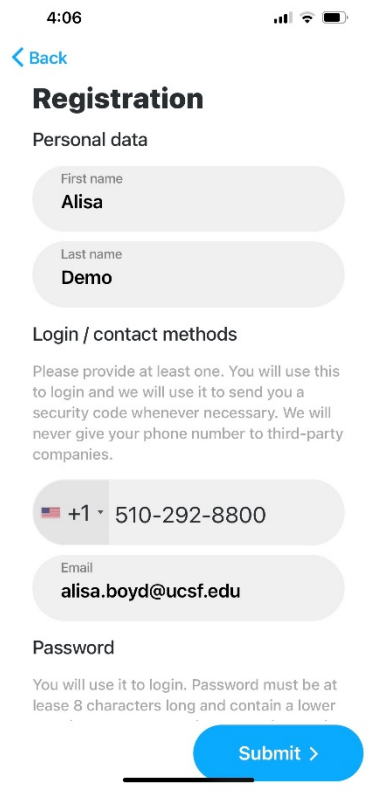

Tap Register.

 <p>3:13</p> <p>Back</p> <h2>Join your hospital</h2> <p>Enter the invitation code provided by your care team:</p> <p>Invitation code</p> <p>Next</p> <p>Ask your care team for a code if you do not have one.</p> <p>Contact support@chanlhealth.com for app support</p>	<p>Enter the invitation code from the text message.</p>
 <p>4:02</p> <p>Back</p> <h2>Verify your identity</h2> <p>Hi Alisa!</p> <p>Please answer the security question to verify your identity. Not you? Go back.</p> <p>Enter your date of birth:</p> <p>MM/DD/YYYY</p> <p>01/01/1960</p> <p>Next</p>	<p>You will be asked to verify your identity – type in your date of birth.</p>

	<p>to send you notifications. We recommend that you turn notification on.</p> <p>After that, you should see the Today screen.</p>
--	-----------------------------------------------------------------------------------------------------------------------------------

Orientation to Application

Now I am going to show some of the main features of the application.

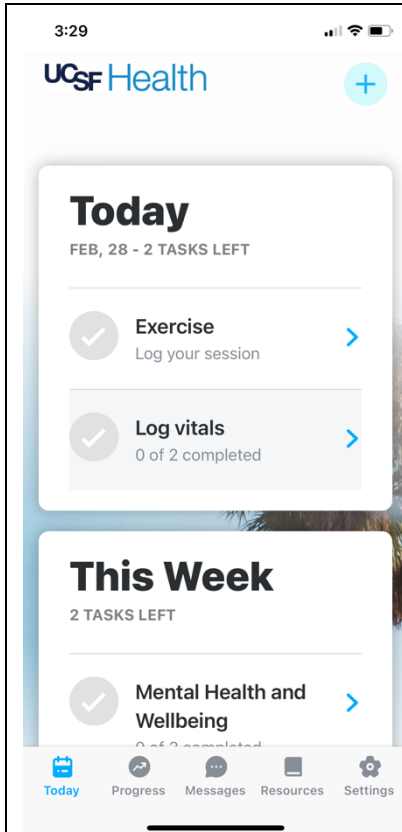

Screen	What to do on screen
	<p>This is the main screen for the app – the “Today” screen.</p> <p>In the main part of the screen you will see your tasks, like exercise and logging vitals.</p> <p>At the bottom you will see buttons to help navigate – Today takes you back to this screen, progress shows what you have done, messages lets you chat with the cardiac rehab team, resources includes some education materials, and settings lets you change the app settings.</p>

Task 1 – Enter blood pressure

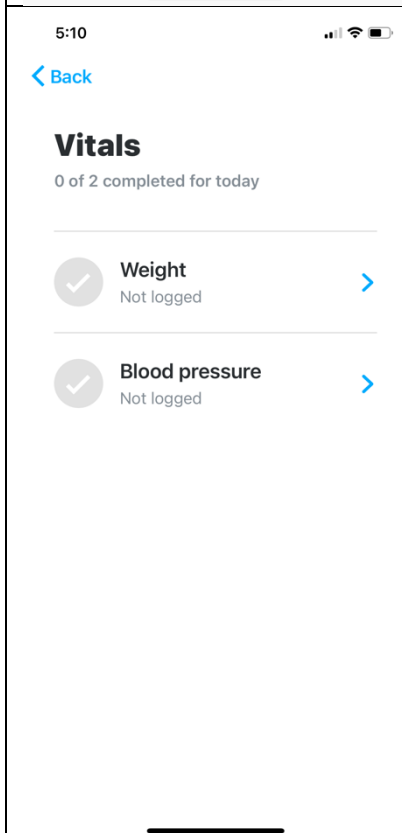

Now I want YOU to practice using some of the main features of the app. First, I want you to enter a blood pressure. [patient should be interacting with app]

Screen	What to do on screen
--------	----------------------

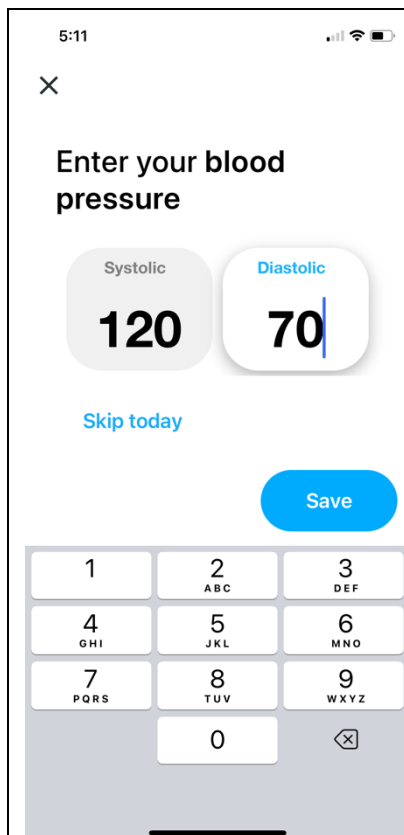

Tap on "Log vitals" in the Today part of the screen.

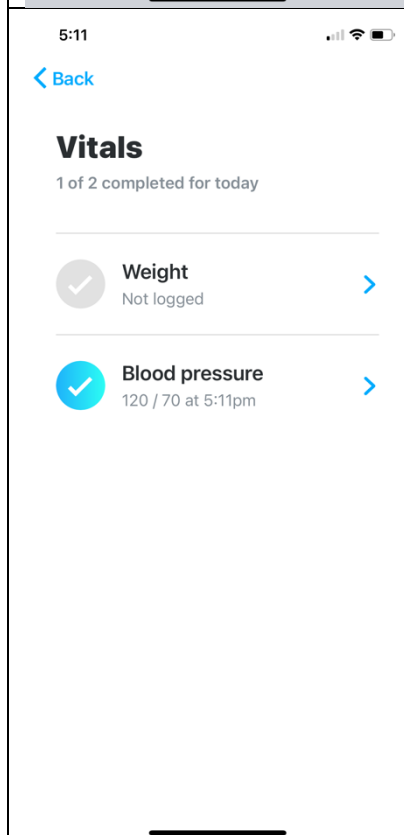

Tap on "Blood pressure". You can also log your weight here if you are following your weight.

Enter your systolic and diastolic blood pressure using the keypad. Then tap the blue “Save” button.

You may also be asked to enter your heart rate and whether you are sitting or standing.

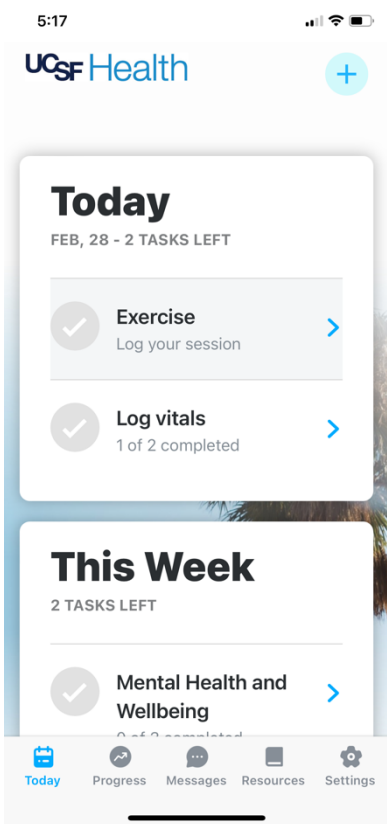

Now you see that your blood pressure has been logged. You can use the “Back” button at the top left to go back to the Today screen.

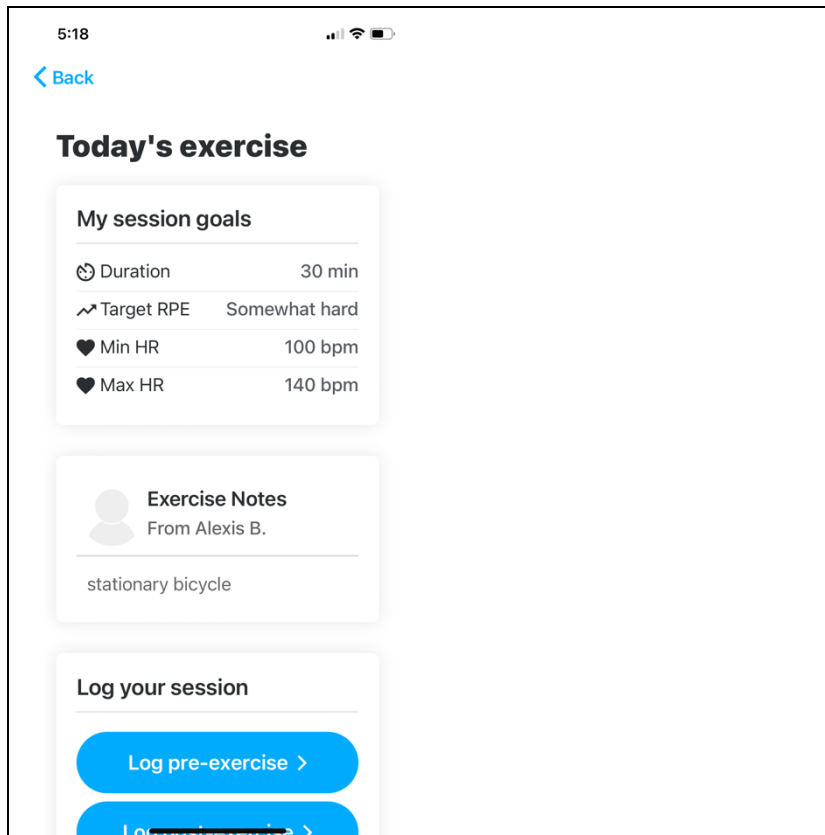

Task 2 – Enter a physical activity session

Next, I want you to enter a physical activity session.

[include step-by-step instructions and screenshots for how the patient enters a physical activity session]

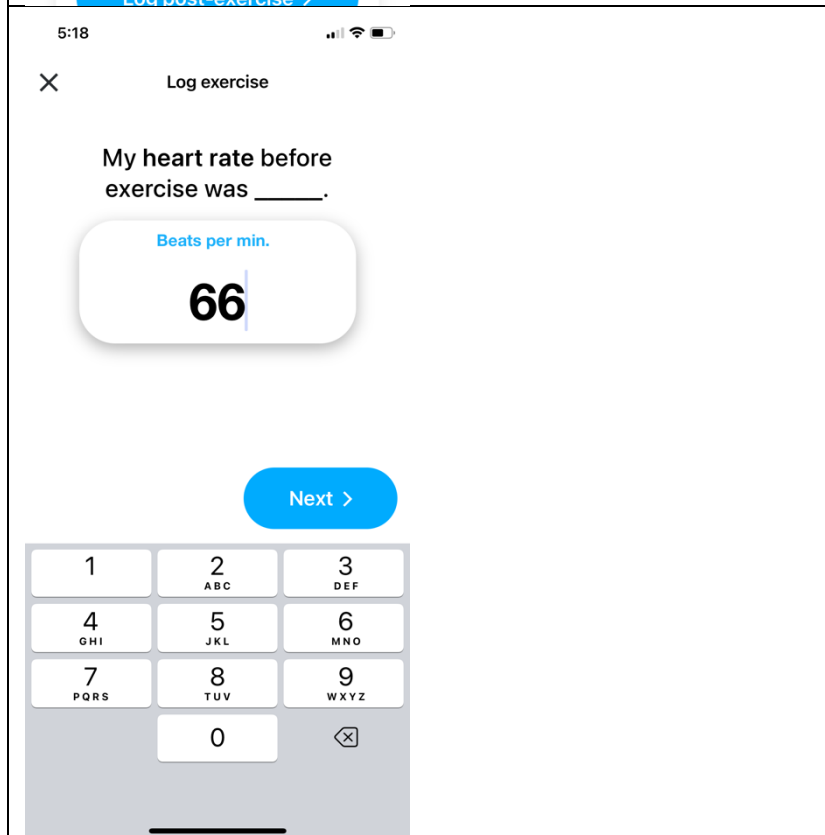

Screen	What to do on screen
	From the Today screen, tap on "Exercise".

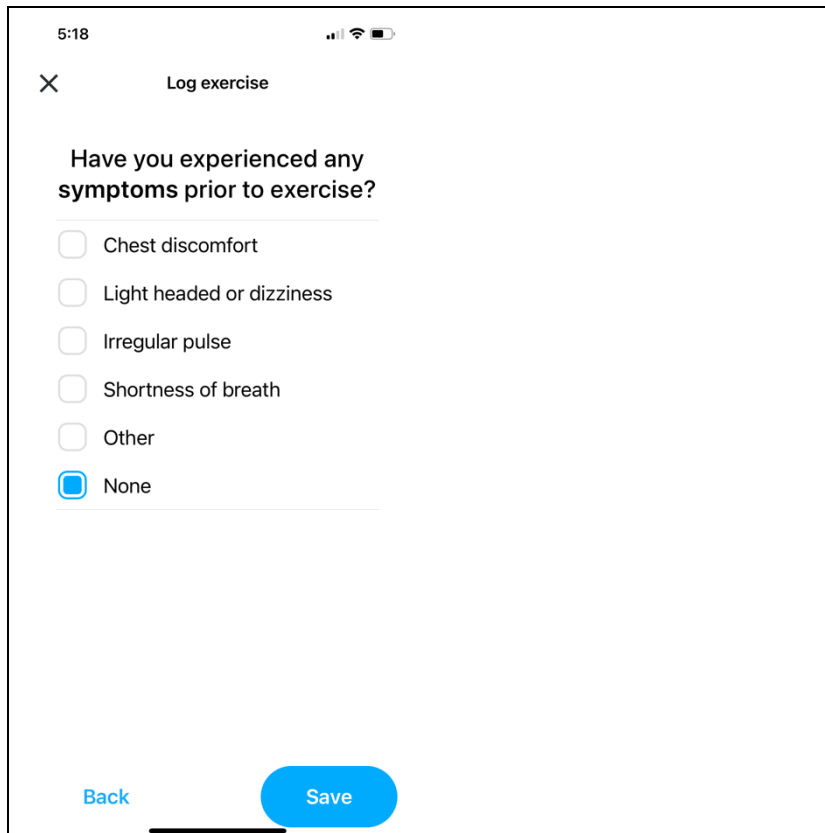

At the top you will see your exercise prescription from your cardiac rehab team.

Tap "Log pre-exercise"

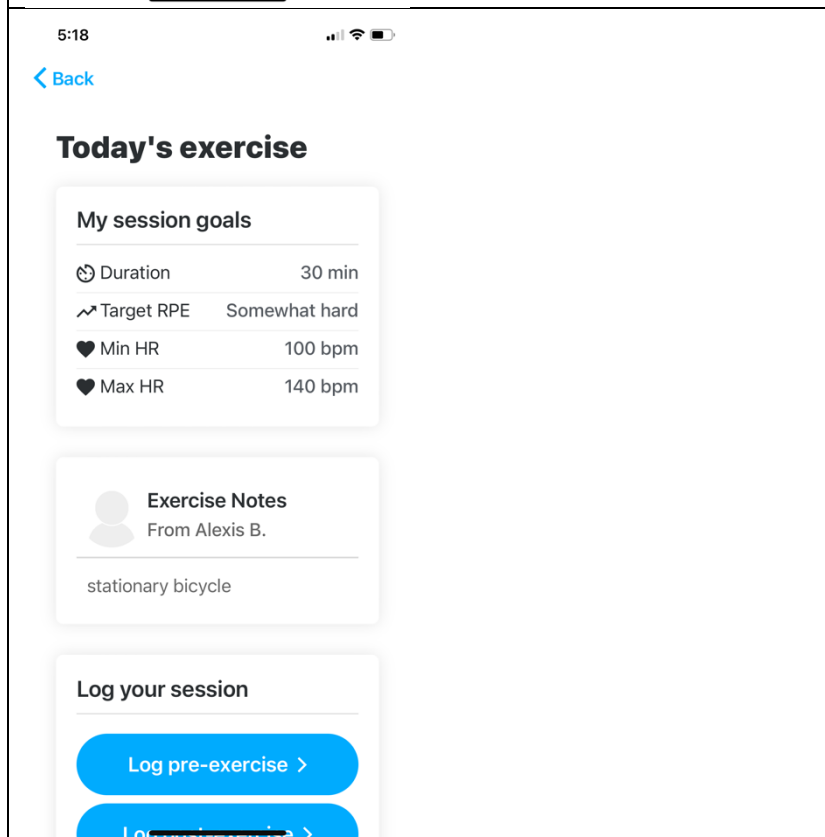

Enter your pre-exercise heart rate and tap "Next"

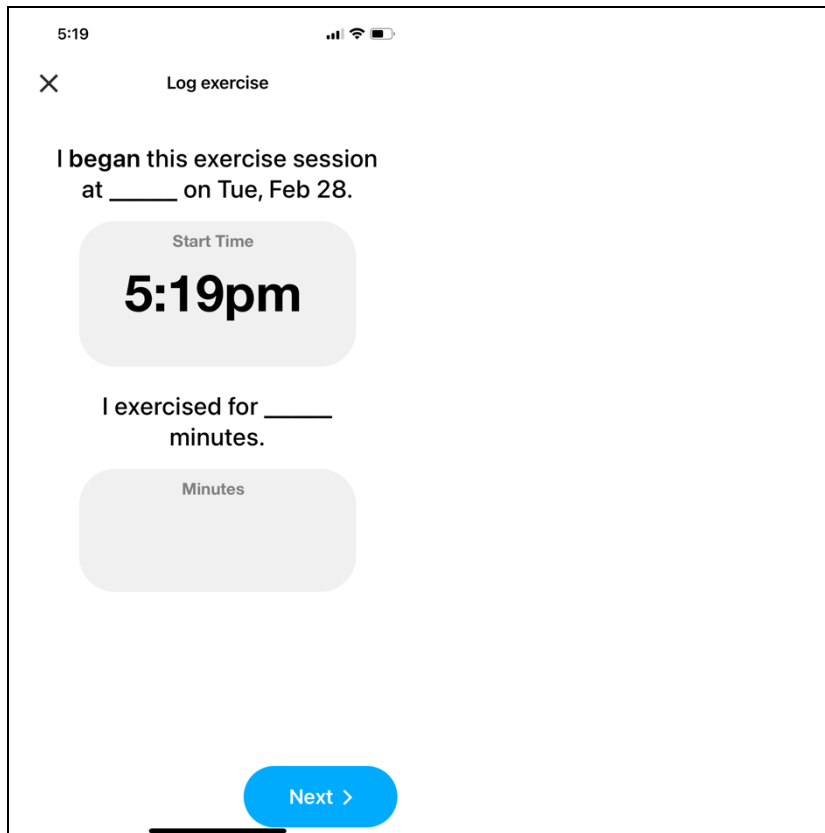

Enter any symptoms you had before exercise and tap "Save"

Now tap "Log post-exercise"

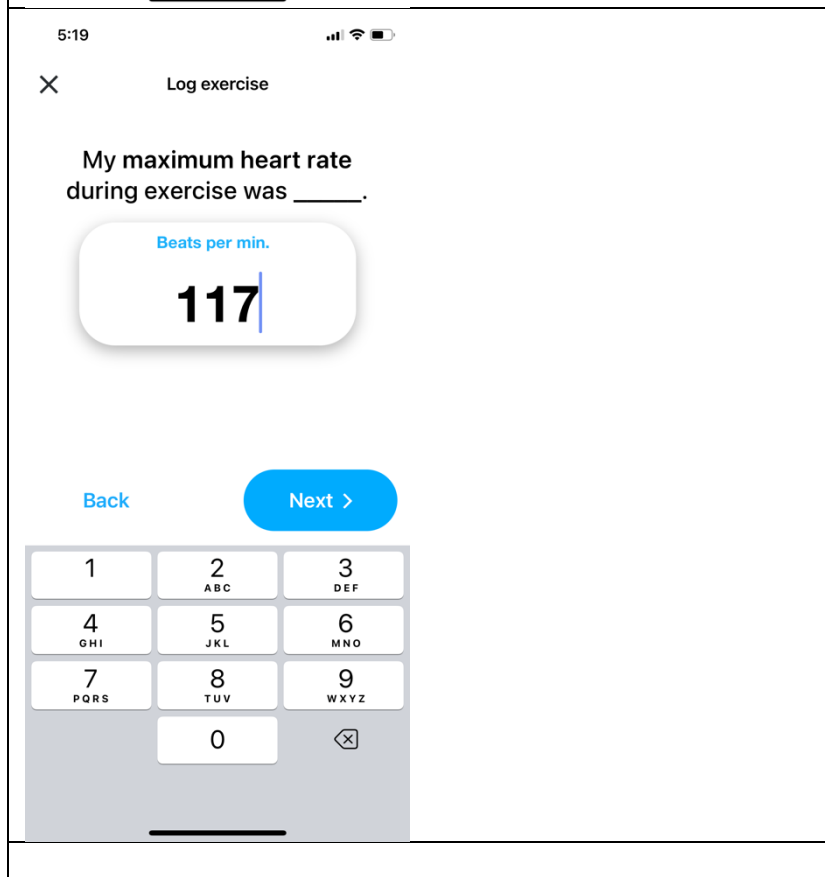

Enter your number of exercise minutes by tapping in the grey box with minutes in it.

If you want to keep track of the time you start exercise, you can.

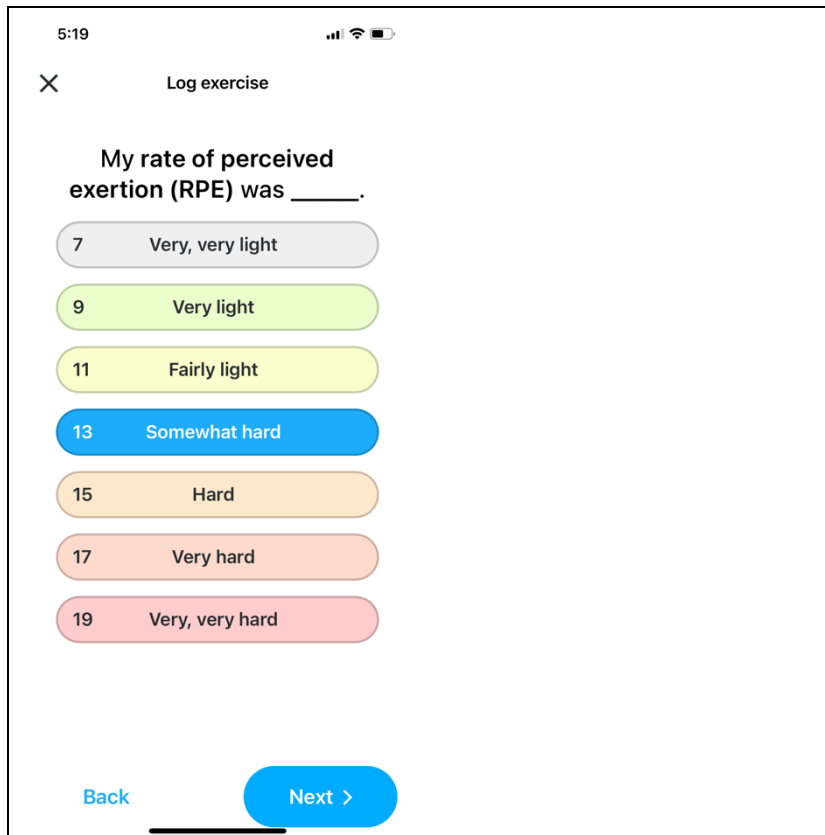

Tap "Next"

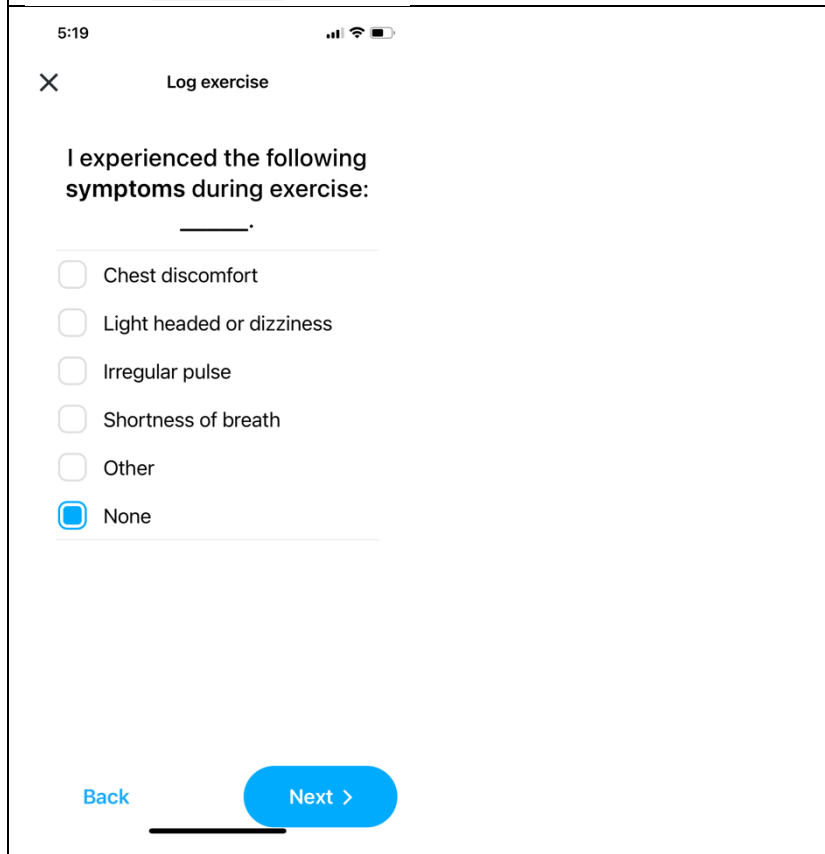

There will be a series of screens to keep entering information and tapping "Next"

Enter your exercise heart rate, then tap "Next"

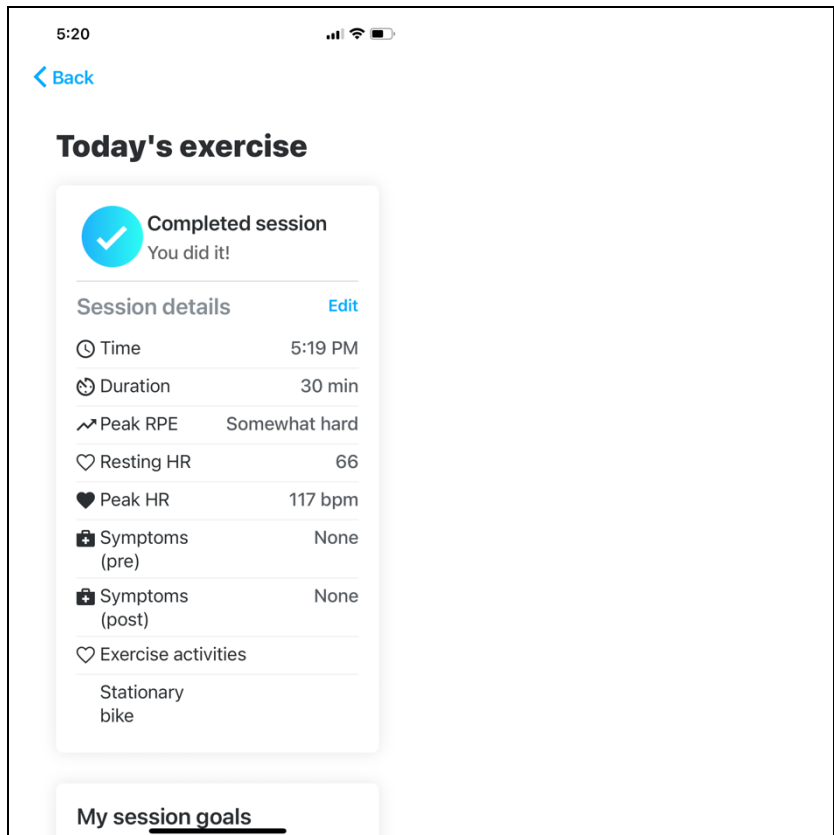

Enter your RPE (rate of perceived exertion), then tap "Next"

Enter any symptoms you had during exercise, then tap "Next"

You may see other screens asking you for additional information – enter information on those screens and on the last screen tap "Save."

 <p>5:20</p> <p>Back</p> <h3>Today's exercise</h3> <p> Completed session You did it!</p> <p>Session details Edit</p> <ul style="list-style-type: none"> 🕒 Time: 5:19 PM 🕒 Duration: 30 min ↗️ Peak RPE: Somewhat hard 📏 Resting HR: 66 ❤️ Peak HR: 117 bpm 🏠 Symptoms (pre): None 🏠 Symptoms (post): None 📏 Exercise activities: Stationary bike <p>My <u>session goals</u></p>	<p>Then it will show you a summary of your session. If anything is missing or doesn't look right, you can tap "Edit" next to Session details.</p> <p>You can get back to the Today screen from the "Back" button in the upper left hand corner.</p>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Task 3 – View an education module

Next, I want you to view an education module.

Screen	What to do on screen
--------	----------------------

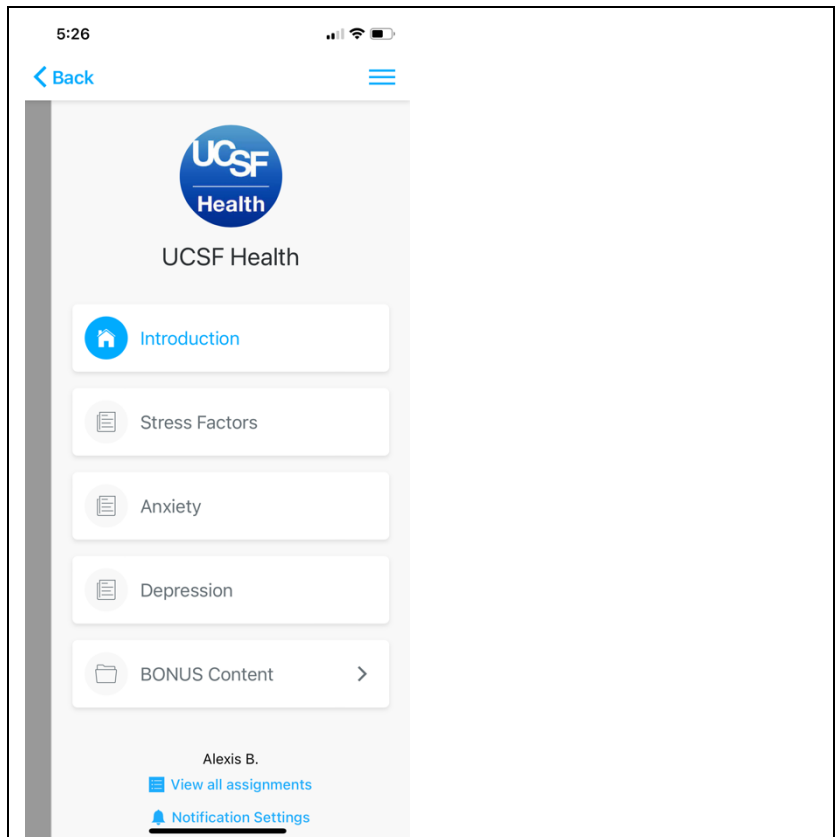

From the Today screen, tap on one of the tasks in the “This Week” section.

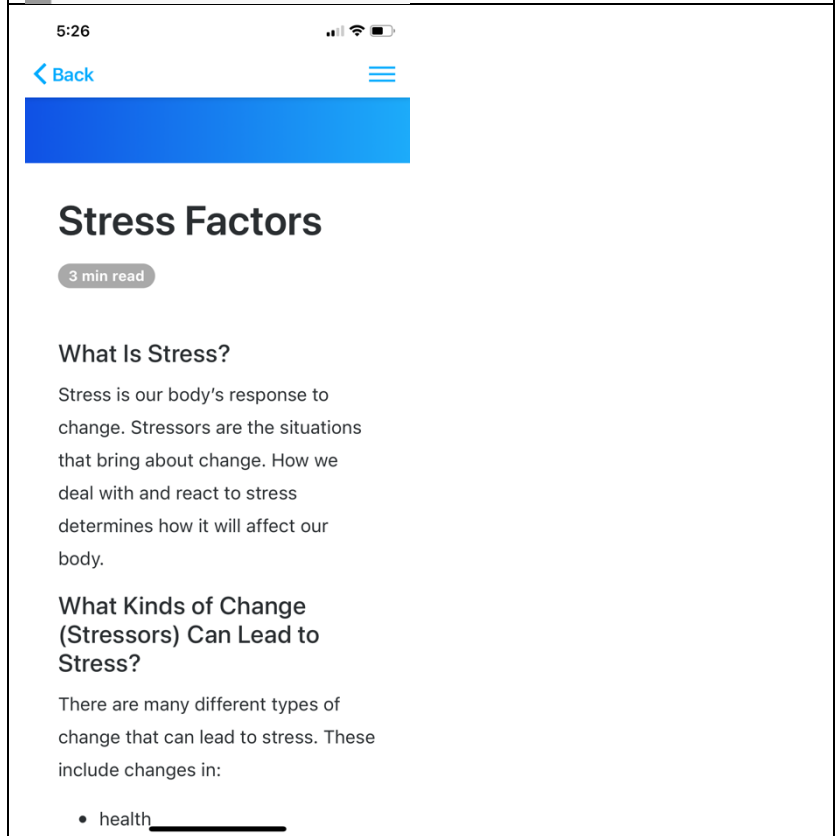

You will then see an introduction to an education module. You can get to more articles in the module, by tapping on the menu – the three lines in the upper right hand corner.

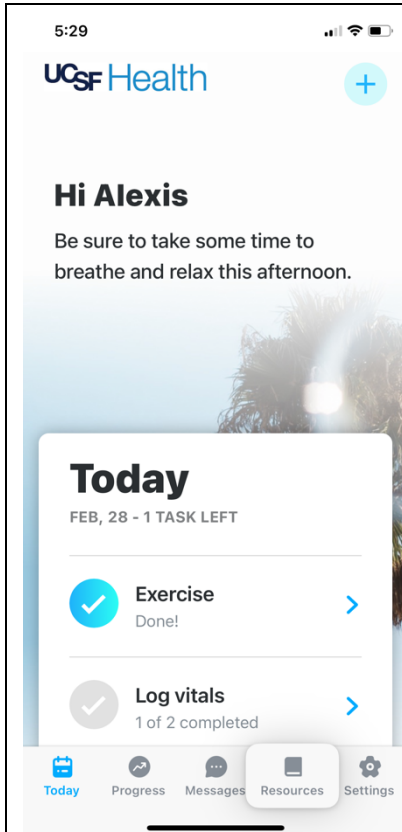

Tap on one of the boxes to read more about a topic.

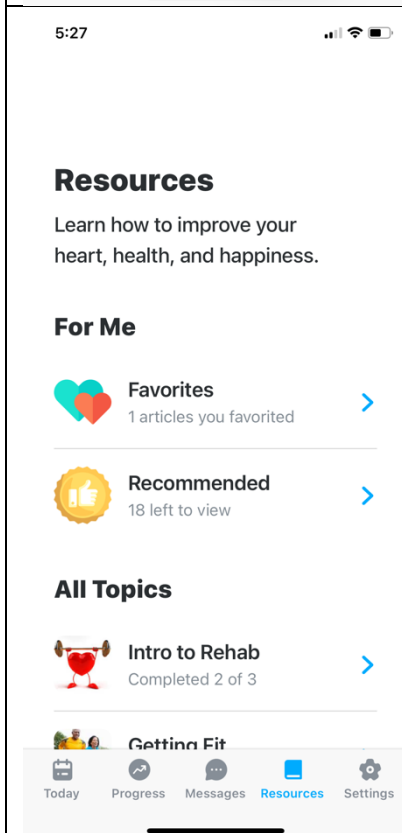

The module will tell you more about the topic and about how long it will take.

You can tap the “Back” button at the top left to go back to the Today screen or the Menu button at the top right to go to more education modules.

Go back to the Today screen. From the Today screen, you can also tap on the “Resources” button at the bottom to access more education articles. Tap on Resources.

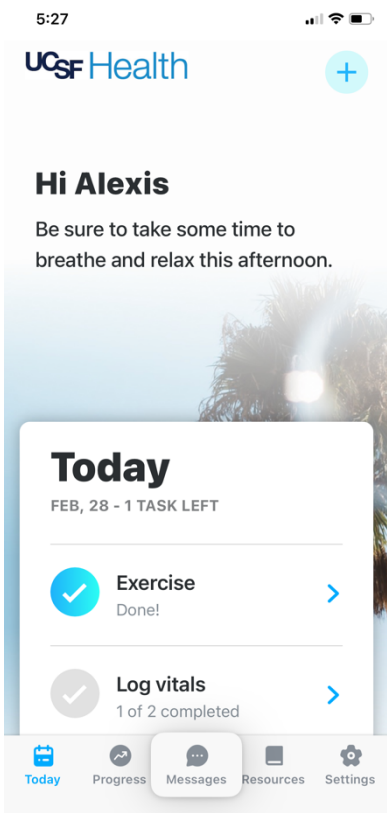

Here you can see additional articles.

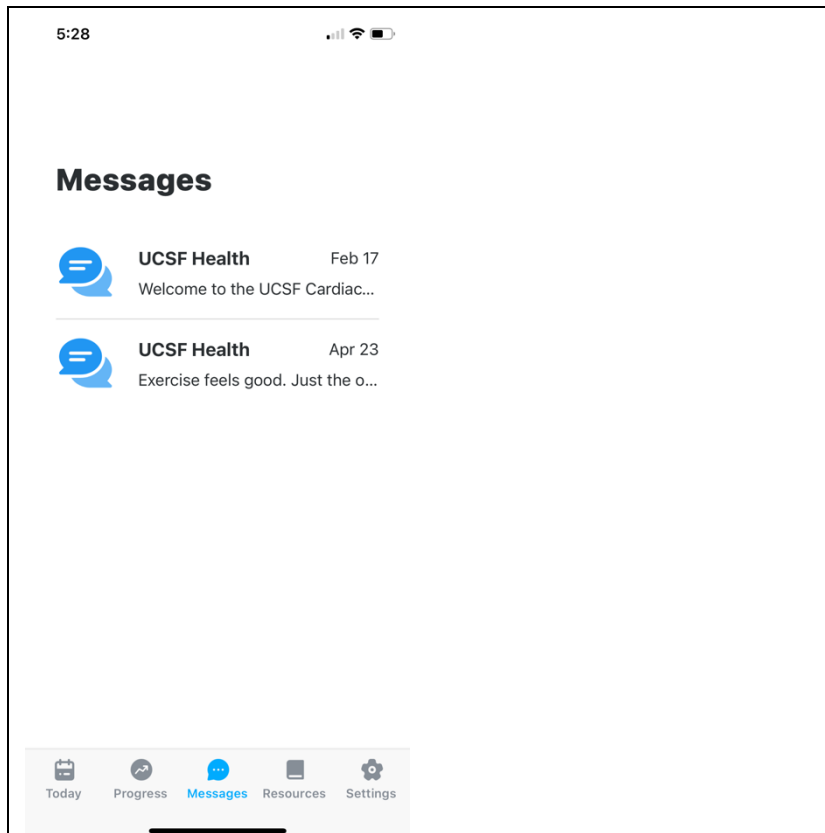

Task 4 – Send a chat message to CR staff

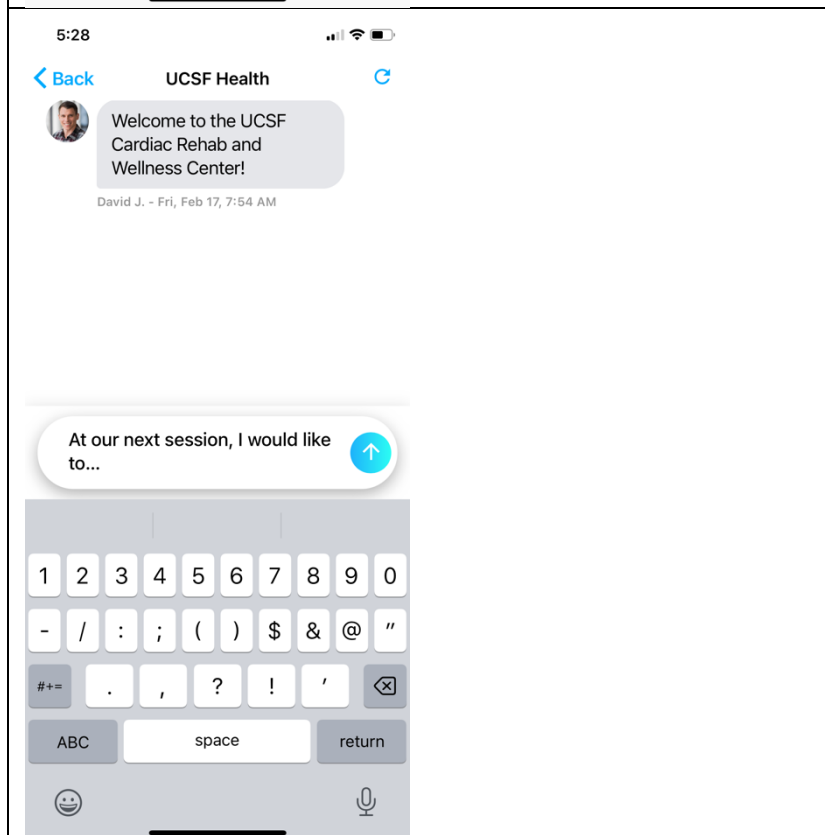

Next, I want you to send a chat message to the CR staff.

Screen	What to do on screen
	<p>From the Today screen, tap on “Messages” at the bottom.</p>

Here, you will see messages from the cardiac rehab team. Tap on the “Welcome to...” message.

Here, you can read the message from the cardiac rehab team and send a message to the cardiac rehab team by typing in the box.

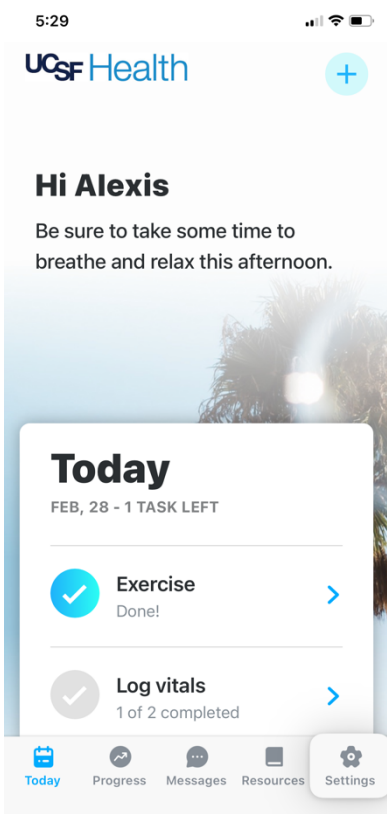

To send the message, tap the blue button with the arrow.

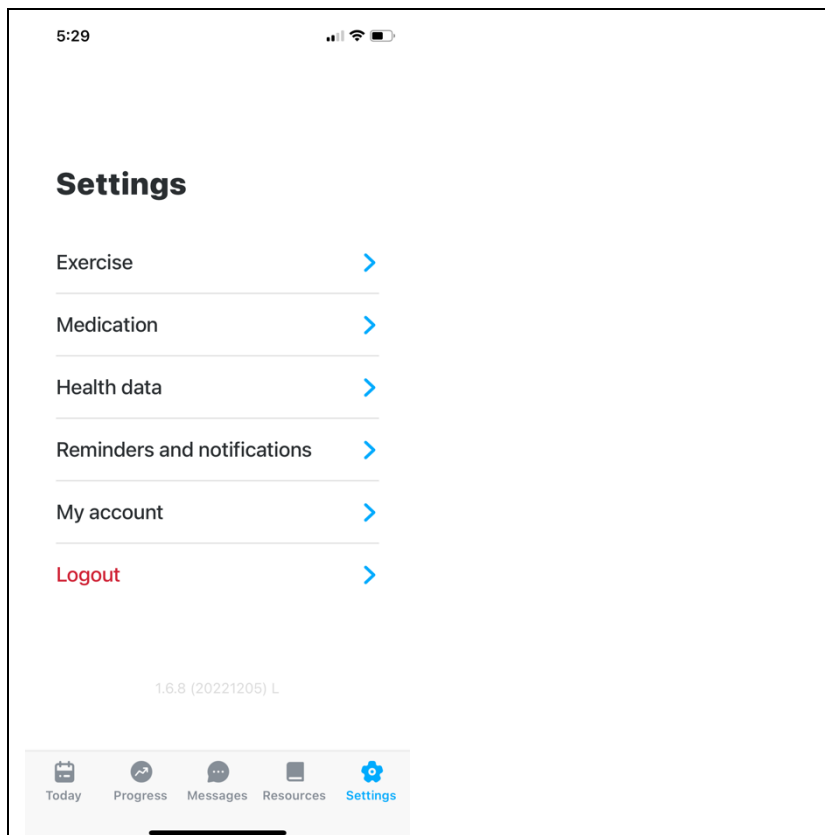

We look at these messages Monday to Friday 9-5. These messages are for non-urgent questions. For example – if you would like to send a message about something you want to learn about or talk about at our next session. These messages are not for urgent symptoms like chest pain – remember – if you are having new symptoms or symptoms that you are concerned about, you should follow your safety plan.

Task 5 - Medication Reminders

Would you like to set up medication reminders with the app? The app can remind you to take your medications at certain times of the day.

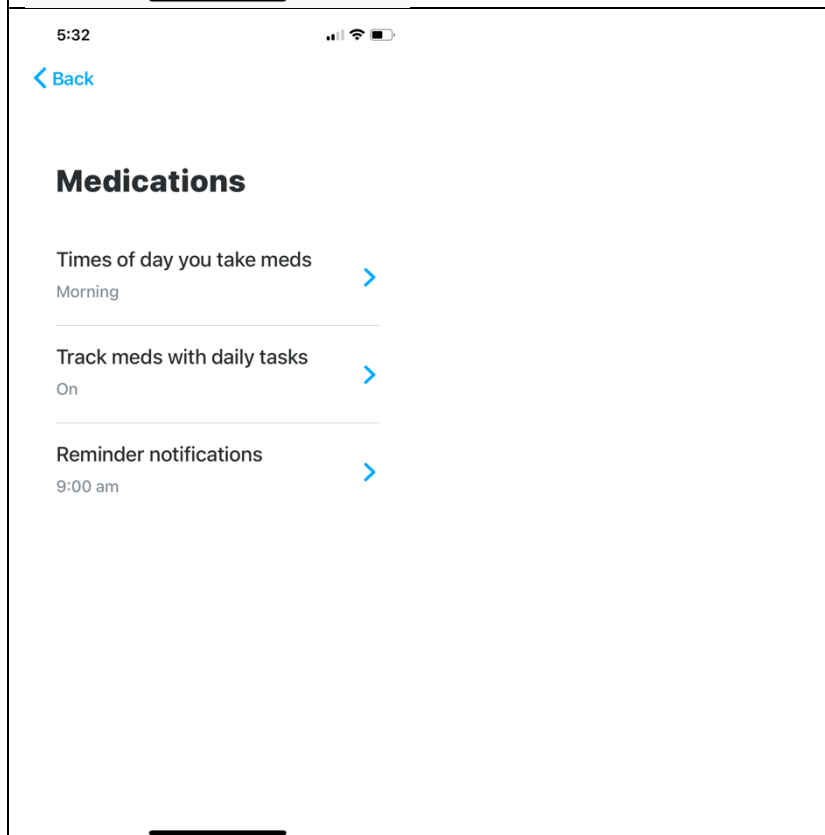

Screen	What to do on screen
	<p>From the Today screen, tap on “Settings” at the bottom.</p>

Here, you can change a lot of settings for the app, like turning notifications and reminders on and off.

Tap “Medication”

Here, you can set the times of day you take meds, whether you want to track meds with your daily tasks on the “Today” screen, and if you want to get reminder notifications.

5:29

[Back](#)

Times of day you take meds

Morning

Afternoon

Evening

Night

I set the time of day to Morning, but you can set afternoon, evening, or night, too.

5:30

[Back](#)

Track meds with daily tasks

Enabled

I enabled tracking meds with my daily tasks.

<p>5:29 📶 🔋</p> <p>← Back</p> <h3>Medication reminders</h3> <p>Evening</p> <p>Reminder <input type="checkbox"/></p> <p>Hour of reminder 05:00PM</p> <p>Morning</p> <p>Reminder <input checked="" type="checkbox"/></p> <p>Hour of reminder 09:00AM</p> <p>Afternoon</p> <p>Reminder <input type="checkbox"/></p> <p>Hour of reminder 12:00PM</p>	<p>And I set a morning reminder for 9AM.</p>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------

Conclusion

Do you have any other questions about using the app?
